Full HD display

ED273 B brings users into a perfect colorful world in Full HD 1920 x 1080, and provides the finest natural and sharp original quality with VA * panel and 100,000,000:1 contrast ratio.

1ms Visual Response Boost™

1ms Visual Response Boost™ (VRB), works by either quickly turning off the backlight or inserting a blank, black image between frames aka “blinking”. This results in less noticeable blur in fast moving images because the liquid crystals don't have to double up on frames as they rise and fall.

AMD FreeSync Premium

With AMD FreeSync Premium, the game's frame rate is determined by your graphics card, not the fixed refresh rate of the monitor. This means the monitor's frames are synced with the graphics card's frames, which eliminates screen tearing and delivers very smooth gaming experiences.

Curved 16:9

With Curvature of 16:9 display ratio, Acer ED273 A gives you a more enveloping viewing experience because their screens wrap around you, thus drawing you deeper into everything.
